

FRACKING POISONS WATER, AIR & SOIL

“In Louisiana, **SEVENTEEN COWS DIED**

AFTER AN HOUR’S EXPOSURE TO SPILLED FRACKING FLUID. (Most likely cause: respiratory failure.) In north central Pennsylvania, 140 cattle were exposed to fracking wastewater when an impoundment was breached.

APPROXIMATELY SEVENTY COWS DIED;

THE REMAINDER PRODUCED ELEVEN CALVES, OF WHICH ONLY THREE SURVIVED. In western Pennsylvania, an **overflowing waste pit** sent fracking chemicals into a pond and a pasture where **pregnant cows grazed: HALF THEIR CALVES WERE BORN DEAD.** The following year’s animal births were sexually skewed, with ten females & two males, instead of the usual 50-50 or 60-40 split”.

*Extract from The Nation
by Elizabeth Royte*

**What will your animals eat & drink?
Gas drilling cannot be done without environmental impact!**

CLARE TOWNLANDS IN ENEGI OIL LICENSING OPTION AREA

Residents should contact FERGUS O'DOWD TD, with concerns *email: fergus.odowd@oir.ie | tel: 01-6782024*

Dept. of Communications, Energy & Natural Resources, 29-31 Adelaide Rd, Dublin 2.

KEEP CLARE FRACKING FREE

What else can you do?

- **Contact** your local TDs & Councillors.
- Tell them you are **concerned** about the effects of fracking on your water, air, soil, environment & livelihood!
- Ask them **how they intend to protect** your family, cattle & land.

• Contact **“Fracking Free Clare”**
email: clarefrack@gmail.com or ring
Becky on 087 9160 175.

- Watch the film **GASLAND**, which portrays the **negative impact of fracking in America.** Simply search YouTube.

Fracking is NOT BANNED in Clare.
Despite a unanimous vote in opposition to fracking by Clare County Council, it is the National Government that will make the decision whether or not to allow fracking in Clare.
